Extract from MAVA-2190, dated 6 December 1948.

SOI 7/2, Operational Tasks

~~CONFIDENTIAL~~

The last two of the ten W/T sets initially received by the station have been buried. Detailed memoranda on placement of all sets have been forwarded to Washington. [] visited the station in November, went over these memoranda, and expressed his satisfaction with the manner in which the operation had been carried out. We have received four additional sets for placement in Linz and Salzburg and have urgently instructed [] and [] to attempt recruitment of W/T operators for those areas. The Salzburg section is attempting to locate a site for placement of a powerful relay transmitter in the mountains near Salzburg as, given the change in planning regarding location of the base station, it will be necessary to relay messages both ways because of the longer distances envisaged, that is, transmittal to points beyond the continent rather than to Germany.
